SMOKING CABINS

**SMOKE
'n
GO**

Facilitate smoking while
protecting non-smokers

Smoking cabin Plaza incl. sliding door, poster displays, foot and lean-to support.

DO YOU OFFER A SMOKE-FREE ENVIRONMENT?

We do. Plymovent offers a complete line of innovative products, all designed to assist in the removal of unwanted tobacco smoke. We can create an environment in which both smokers and non-smokers can work perfectly together. Even without the annoyance of tobacco smoke and unpleasant smells. Whether you prefer a separate smoking room or a designated smoking area, Plymovent offers the perfect solution.

LEGISLATION

In many countries, smoking is prohibited by law within workplaces. Therefore, we developed the smoking cabin. A quick smoke and back to work; that is the idea behind the smoking cabins of Plymovent. The freestanding, modular smoking cabin can be installed everywhere - for example, inside your office, in a corridor, near the coffee corner or in a public area.

UNRIVALLED PERFORMANCE

The unrivalled performance of the smoking cabin is most impressive, thanks to its unique four-phase filtration system. Not only does the cabin remove unpleasant odours, gasses and tobacco smoke, the cabin also improves the overall indoor air quality, seen that clean air is re-circulated. The push-pull system in the roof of the cabin optimises the airflow and assures that smoke does not linger. The smoking cabin purifies air efficiently and practically noiseless.

In addition, we would like to point out the ingenious odourless ashtray: still-burning cigarette and cigar butts disappear without a trace of smoke or annoying smells. This also enhances the fire safety in your company. The ashtray has a capacity of several thousands of cigarette butts.

ENERGY-SAVING

The automatic start/stop system ensures that air cleaning only takes place when somebody is actually present in the cabin, thus saving energy.

Plymovent creates a pleasant environment for smokers as well as non-smokers in organisations, institutes and public buildings.

poster display

The smoking cabins are extendable with various accessories such as foot support, (self-closing) sliding doors, lean-to support, a doorstep and advertisement display. The display can be used for all kinds of (company) information or marketing purposes.

CHARACTERISTICS

- Unique four-phase filtration system
- Effective filtration
- Low noise level
- Modular (flexible) system
- Transparent design
- Freestanding unit, operates independently

ALWAYS A SUITABLE SOLUTION

The smoking cabin is available in various sizes and settings - from Compact models for smaller locations to Plaza units for large designated smoking areas. They can be placed at strategic locations, optimising the traffic patterns within your building. In addition, various options are available to meet your specific requirements.

ADVANTAGES

- Fits any smoking policy
- Efficient and cost-saving
- Occupies little floor space
- Blends in any environment
- Odourless ashtray; no trace of smoke and smells

ELEGANT DESIGN

The smoking cabins blend in perfectly with virtually any environment thanks to their stylish and elegant design. The glass walls are made of safety glass and create a pleasant open feeling for smokers, so they do not feel left out.

EFFICIENT AND COST-SAVING

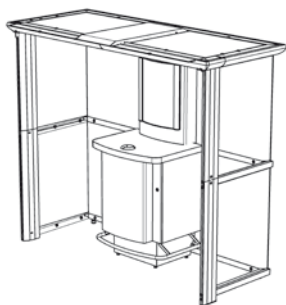

Those in need of a quick smoke break do not need to go outside; instead they can stay near their workplace. It does not only save time, the costs per smoker are also lowered. Thanks to its compact design, the smoking cabin hardly occupies expensive floor space.

YOUR BENEFIT

Staff can remain in the vicinity of their place of work during their break for a smoke, which promotes a good atmosphere at work and increases productivity. An innovative appliance, such as the smoking cabin, benefits a good smoking policy. It strengthens your company image, demonstrating that you take the interests of all your staff, smokers and non-smokers alike, seriously.

The smoking cabins of Plymovent have been tested exhaustively and are certified by the European ECN, German TÜV and BGIA institute on safety and efficiency.

PLYMOVENT OFFERS ALL-IN SOLUTIONS FOR AIR CLEANING

For over 35 years, Plymovent has gained experience in the field of air cleaning. Not only do we have a profound knowledge of indoor air and the removal of tobacco smoke, we are also specialised in - among others - extraction and filtration of welding fumes and oil mist in metalworking industries and the removal of vehicle exhaust fumes.

To solve problems with tobacco smoke, we offer the Smoke 'n Go range. This is a complete line of innovative appliances from air cleaners, smoking tables and ashtrays to equip a professional smoking room up to the elegant smoking cabins. A concept that perfectly matches your specific smoking policy. For more information, please contact your Plymovent distributor or visit www.plymovent.com.
